

## Reflections on Enlightenment

By George A. Boyd © 2006

Published in *Religions, Cults, and Terrorism: What the Heck Are We Doing?*

Enlightenment has been variously construed in different traditions. Among these definitions that have been advanced are:

<b>Purported States of Enlightenment</b>
Union with Voidness of Consciousness (Being) in the Metaconscious Mind
Union with Soul Spark
Union with the Wave of Present Time on the Akashic Records Subplane
Union with Planetary Soul
Union with Christ Child (Moon Soul) Nucleus of Identity
Taking the Fourth Planetary Initiation
Union with Cosmic Consciousness Nucleus of Identity
Union with the Astral Soul
Attainment of Yogi Preceptor Stage
Union with a Supracosmic Path Nucleus of Identity
Union with the Supracosmic Soul
Union with the spirit on a Transcendental Path
Union with a Transcendental Ensouling Entity
Union with Satchitananda

We prefer to refer to enlightenment as the union of the attention with your cutting edge ensouling entity. This recognition of the integration center of your Superconscious mind brings about:

- (1) Gnosis – the Soul’s realization of its own nature beyond the apperceiving focus of attention
- (2) Activation of the wisdom of the higher mind leading to highest discernment of the Soul’s nature
- (3) Activation of the higher octaves of the will
- (4) Activation of the unconditional love, compassion, and understanding of the Soul
- (5) In advanced disciples, this may also activate the Guide faculty, which can lead the spirit and the attentional principle into union with the Soul
- (6) In some cases, this may result in a dialog between the personality and the Soul, in which the Soul imparts revelation of its nature, answers questions, and gives personal guidance
- (7) In some cases, the full awakening of the Kundalini Shakti to the level of your Soul may accompany the experience of enlightenment

If you meditate and master the art of focusing your attention, you will be able to move your awareness at will to each of the purported states of enlightenment listed above.

You will be able to activate your innate enlightenment that is present at your cutting edge of spirituality and bring your Soul’s love, wisdom, and power into manifestation.

As you advance on the path, you will be able to guide others into union with their Soul. You will begin to receive guidance and inspiration from your Soul. You will experience the awakening of your kundalini Shakti in a spontaneous and natural way.

As your grasp of your enlightened nature grows, you will begin to bring the fruits of your enlightenment into expression by creativity, teaching, counseling, and changes in your lifestyle. As enlightenment guides you, it will move your life experience into a dramatic new context in which much that seemed impossible now seems possible; much that seemed unattainable now seems attainable.

We encourage you to master the art of meditation to activate your innate enlightenment and enjoy the many fruits that this state confers.

## **The Exploring Enlightenment Process**

In this meditation, your task will be to enter selected focal points in which you are present as a conscious entity. You will explore this state through identification and monitoring your experience.

So for example, we will begin by focusing your attention on the attentional principle.

You first affirm: "I am the attentional principle," or "I am consciousness."

You then monitor the following eight anchoring principles:

- (1) Notice what you feel in this state
- (2) Notice what you hear in this state
- (3) Notice what you see in this state
- (4) Notice what you taste or smell in this state
- (5) Notice what you know in this state
- (6) Notice what abilities you have in this state
- (7) Notice the love or compassion you express in this state
- (8) Notice who you are in this state

We will perform identification and monitoring for each of the following centers:

- A) The Voidness of Consciousness (Being) in the Metaconscious Mind
- B) The Wave of Present Time on the Akashic Records Subplane
- C) The Christ Child (Moon Soul) Nucleus of Identity
- D) The Augoiedes of the Fourth Planetary Initiation
- E) The Planetary Soul or the Monad

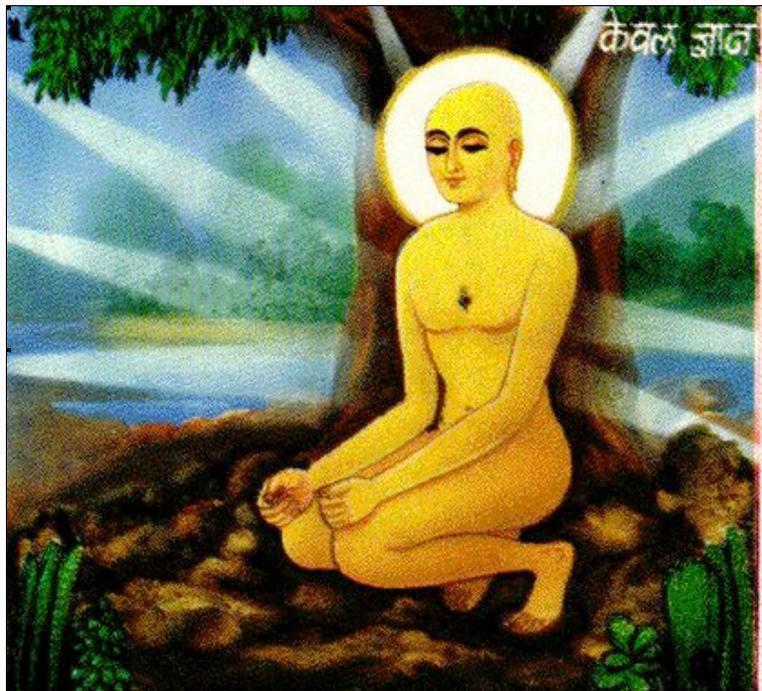

- F) Union with Cosmic Consciousness Nucleus of Identity
- G) The Astral Soul
- H) Your aligned Supracosmic Path Nucleus of Identity
- I) The Supracosmic Soul
- J) Your aligned spirit on a Transcendental Path
- K) Your aligned Transcendental Ensouling Entity
- L) Satchitananda
- M) The Soul of the Bridge Path

As you identify and monitor each of these states in turn, your task will be to assess

What feels like my authentic core of knowledge, love, and power?

Which of these states are active in me and influence my personality?

In which state do I feel I have touched my enlightened nature?

## Expanding upon Enlightenment

Once you have identified your nucleus of enlightenment, you can expand upon this initial insight through looking at the following dimensions of enlightenment:

How can I express my enlightened core in

- My daily life?
- My relationship(s)?
- My career?
- My service to others?
- My creative abilities?
- My spiritual growth?
